## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.  
PCT/EP2004/003959

Box No. V **Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

## 1. Statement

Novelty (N)	Claims	1-8	YES
	Claims		NO
Inventive step (IS)	Claims	1-8	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims		NO

## 2. Citations and explanations (Rule 70.7)

Reference is made to the following document:

**D5: DE 196 54 035.**

1. **Novelty and inventive step**

The present application meets the requirements of PCT Article 33(1) because the subject matter of the claims satisfies the PCT requirements for novelty and inventive step.

1.1 Document **D5** is considered the prior art closest to the subject matter of claim 1. It discloses (page 2, lines 8-14; page 5, line 40, to page 6, line 7) the use of a heat-accumulating microcapsule dispersion as a heat transfer medium. The microcapsules contained in the heat storing fluid have a latent-heat storing material as a capsule core and a polymer as a wall material. A polymethyl acrylate is also specified as one of the possible materials (see page 5, lines 64-66).

## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.  
PCT/EP2004/003959

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The subject matter of claim 1 therefore differs from the known document **D5** in that cross-linked acrylates are used as a wall material.

Consequently, the subject matter of claim 1 is novel (PCT Article 33(2)).

1.2 To establish whether the invention involves an inventive step relative to document **D5**, it is necessary to determine what technical effect is brought about by the distinguishing feature.

It is not clear what technical effect is caused by the difference. In this regard it should be noted that the increased hydrolysis stability cited by the applicant as a technical effect cannot be accepted, since no comparative tests have been submitted.

Consequently, the problem to be solved by the present invention is understood to be that of making available further wall materials. The solution to this problem, as proposed in claim 1 of the present application, is not suggested or disclosed in document **D5** and hence involves an inventive step (PCT Article 33(3)).

1.3 Claims 2-8 are dependent on claim 1 and therefore satisfy the PCT requirements for novelty and inventive step.
